PROJECT

Customer Care Registry

This project aims to develop an application that helps customers process their Complaints. The Customer can raise the ticket with a detailed description of the issue. Customers can view the status of the ticket till the service is provided.

Sentiment Analysis of Twitter Data Using TF-IDF & Machine Learning Techniques

This project analyses the sentiment using the Twitter dataset. It categorizes them based on the polarity level and effectively implements machine learning models with TF-IDF, training, and testing the data set used to obtain the predictive results.

LANGUAGES

- English - Professional Working Proficiency
- Tamil - Native and Bilingual Proficiency
